

**CONNECT &
PROTECT YOUR
WORKFORCE**

PUSH FOR MORE IN CONSTRUCTION

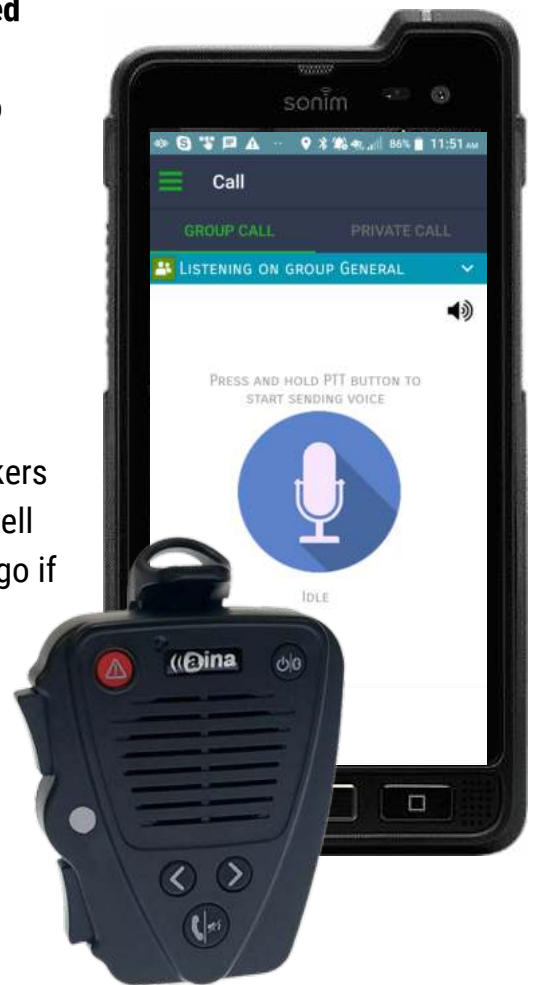

According to a survey of more than 400 construction and project management companies, **92% say they want apps with streamlined features across devices** in order to respond faster in emergency situations, enable team communications from any location, and to more quickly resolve problems and answer customer inquiries.

An Instant Push-to-Talk, Worker Security, Dispatching, and Data Solution, LINX provides all the tools you need in one solution to monitor safety and communicate effectively with your distributed workforce at multiple job sites - anywhere in the world.

Mobile capabilities ensure customer satisfaction by enabling workers to reach on-site teams, other drivers on the road, office staff, as well as communicate directly with contractors and dispatchers on the go if any problems arise.

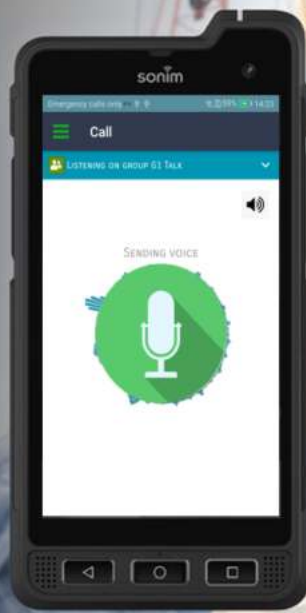

KEY DIFFERENTIATORS

-  Cost Effective
-  Easy to deploy & use on Sonim XP8 Phones
-  Unlimited number of users & groups

Because the most powerful tool on any worksite is communication.

LINX FEATURES:

MOBILE

Push-to-Talk – Immediately reach contacts, groups or your entire team at once with the touch of a button for professional two-way communication.

Record Calls – Calls on the network are saved and stored in downloadable file formats for future playback.

Send Texts & Files – Instant messaging and file transfers to one or many contacts can keep you in touch when voice calls aren't convenient.

Worker Safety – Built-in SOS buttons, Man Down/Lone Worker security features, and the CYRN wearable panic button allow you to monitor your employees and cut down response times.

Real-Time Updates – Notify the team of changes, add members to your groups, and activate dispatch features instantly.

DISPATCH

Push-to-Talk – Group Call, Private Call, and Broadcast All-Call with one touch from your dashboard. See asset's call status and listen to multiple group channels at once.

Alerts, Alarms & Security– Units in distress are displayed instantly on the dashboard to provide crucial details and reduce response time. Emergency SOS Alarms open a live remote monitoring emergency call that records the incident in progress.

Live Global Coverage – Link multiple locations, out-of-town offices, remote workers, international operations and global partners using one LINX network.

Analytics & Reports – Enhance your company's efficiency, response times, safety goals, and customer service by analyzing data from LINX system reports and improving on your daily operations.

Easily Manage All Aspects of your Mobile Enterprise with **One Solution.**

DEPLOYMENT

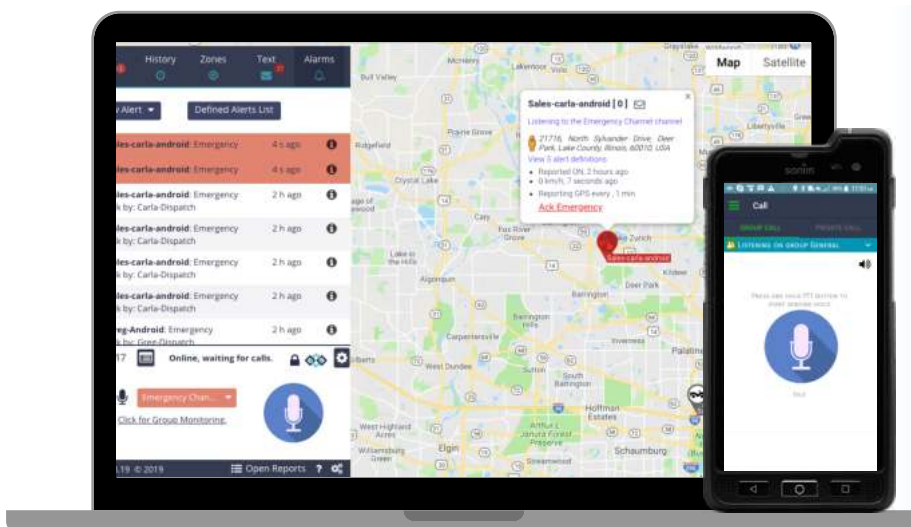

Don't have an IT team? Don't panic. **No expensive cabling, wiring or installation is needed** in order to launch LINX. WiFi or network coverage is all you need.

CONFIGURATION

Our customers can **customize** their network using either the **full feature set** or specific components based on their unique **business needs.**

PROVISIONING

Register users' **access permission**, assign members to groups, set alerts and alarms, and **define service controls** on your LINX network.

LINX seamlessly integrates **voice** and **worker's safety** into a **single, cost-effective** solution, allowing your personnel to **collaborate** more **efficiently** wherever they work.

CYRN PANIC BUTTON

CYRN uses Bluetooth® technology in association with the LINX app to initiate calls and text messages with the user's GPS location from a smartphone.

CYRN can be carried discreetly in a pocket or a bag, worn on the wrist, on a keycard, or around the neck as a pendant.

Harness the full potential of your **LINX** system with compatible accessories delivering increased durability, ease of use and reliability.

- Remote Speaker Microphones
- Headsets
- PTT Buttons and more.

**LOCATE,
COMMUNICATE,
COLLABORATE,
& KEEP SAFE**
