MANAGED COMMUNICATION SOLUTIONS
DESIGNED FOR MOBILE WORKFORCES

LINX consolidates communication, tracking and safety technologies into one, easy to use solution.

Every business has unique needs. For that reason, you can enable as many or few features as needed, and manage the units on the network over-the-air.

BENEFITS

- Improve team collaboration & efficiency
- Reduce communication system costs
- Expand coverage beyond radio, link multiple locations
- Minimize incident response time
- Get up and running out of the box

LINX
FEATURES & FUNCTIONS

MOBILE

Push-to-Talk — Immediately reach contacts, groups or your entire team at once with the touch of a button for professional two-way communication.

Record Calls — Calls on the network are saved & stored similar to voicemail for future playback.

Locate Your Team — Team presence & GPS allows you to view where your group members are located in relation to yourself on a live map.

Send Texts & Files — Instant messaging & image/video file transfers keep you in touch when voice calls aren't convenient. Texts read aloud for hands-free situations.

Worker Safety — Built-in SOS buttons, Man Down/Lone Worker security features, & the CYRN wearable panic button for location based emergency alerts with indoor positioning. Positions are traced with BLE beacon connections.

Real-Time Updates — Command & controlled updates from central managing dashboard: enable/disable units, notify teams of changes, add members to groups, & activate features instantly.

DISPATCH

Push-to-Talk — Group, private & broadcast calls with one touch from your dashboard. See asset's call status, device battery level, & listen to multiple group channels at once.

Asset Tracking & GPS Dispatch — Real-time GPS unit & personnel tracking on a live map with historical trails & playback. Monitor speeding & driver habits.

Zones & Landmarks — Provide oversight & alarms assigned to geographical areas & places of interest for your team's routes, job sites.

Alerts, Alarms & Security— Units in distress are displayed instantly on the dashboard with GPS coordinates & indoor locations to reduce response time.

Live Global Coverage — Link multiple locations, out-of-town offices, remote workers, international operations & global partners using one LINX network.
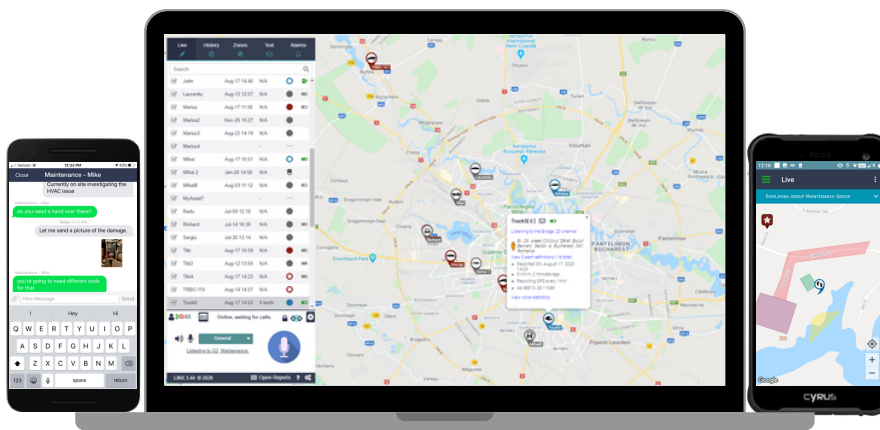

Analytics & Reports — Enhance your company's efficiency, response times, safety goals, & customer service by analyzing data from LINX system reports & improving on your daily operations.
