ThermoCare

Temperature/Humidity/ Electricity Monitoring System

An IoT Solution to monitor Temperature or Humidity sensitive products during production or retail marketing (or) electrical consumption of various units.

Our ThermoCare is designed for the monitoring of temperature critical food items; users include F&B Restaurant operators, Frozen Food/Winery/Chocolate storage providers etc.

The unit also comes with a module for monitoring electrical consumption.

About Us

Established in January 2009, Metropolitan Wireless International Pte Ltd specializes in designing and developing state of the art solutions using mobile wireless communication technologies.

Our Mission is to design & develop specialized products that leverage latest wireless and mobile technologies to deliver integrated & seamless Voice, Data and Video communications to aid Control Centre operations.

In addition to venture into IoT realm to monitor and track various aspect in our ever-advancing technology environment.

Head quartered in Singapore and having an off-shore development centre in Bangalore, India, the core team has a stellar track record in designing and deploying successful and highly reliable solutions.

(ICCS) Integrated Communication Console System | (ALTS) Automatic Location Tracking System | (IoT) Internet of Things Monitoring System

ICCS (Integrated Communication Console System)

ALTS (Automatic Location Tracking System)

AquaCare

Communications Dispatcher System

An integrated voice, data and video dispatcher that provides intuitive dispatching capability to communicate with the field force during critical / emergency operations.

Role & scenario-based configurations.

The system is highly reliable with several layers of redundancy to ensure no interruption especially for those who cannot afford any.

Existing Client

- SMRT (Singapore Metro)
- KVMRT (Malaysia Metro)
- MTRC (Hong Kong Metro)
- TRA (Taiwan Metro)
- SPF (Singapore Police)
- India Metro Lines

Personnel & Vehicle Locationing System

Seamless Outdoor & Indoor tracking for public security, safety and operation staff.

Secure & reliable positioning using affiliation technologies such as: GPS | Wi-Fi | BLE | RFID | UWB.

Flexible rule-based Real-time Alert generation & Notification.

Extensive reports allowing key data to be examined in a variety of formats.

Existing Client

- Police Force
- Military Personnel
- Security Agencies
- Telco Operators
- Civil Defense Personnel

Water Quality Monitoring System

An IoT Solution that monitors water parameters in order to safeguard millions of livestock during the production stage.

Our AquaCare Solution includes the ability to monitor water parameters such as Dissolved-Oxygen, pH, ORP, Conductivity, Salinity, Turbidity, Algae Bloom and more.

We cater for industries such as Aquaculture, Water-agencies monitoring Coastal/ Rivers/Sea waters.
