

LINX

CONNECT & PROTECT YOUR WORKFORCE

PUSH FOR MORE IN ASSISTED LIVING

Connect your teams, keep them **safe**, and power **productivity** with the **LINX** platform.

An Instant Push-to-Talk, Real-Time GPS Tracking, Worker Security, Dispatching, and Data Solution, LINX provides all the tools you need in one app to monitor and manage the activities, whereabouts, safety and overall operations of your entire workforce.

Customize your perfect solution using mobile broadband for push-to-talk access to workers in the field, or operate internally within a centralized facility over your existing WiFi networks.

KEY DIFFERENTIATORS

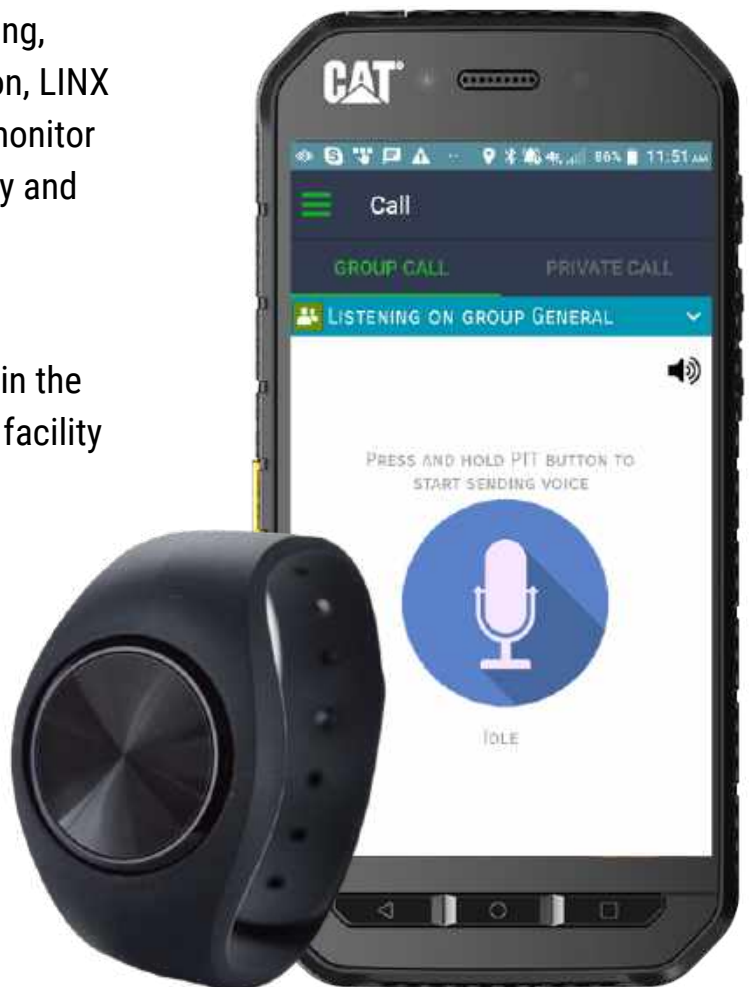

Cost Effective

Easy to Deploy & Use

Unlimited Number of
Users & Groups

LINX FEATURES

MOBILE

Push-to-Talk – Immediately reach contacts, groups or your entire team at once with the touch of a button for professional two-way communication.

Record Calls – Calls on the network are saved and stored in downloadable file formats for future playback.

Locate Your Team – Team presence & GPS allows you to view where your group members are located in relation to yourself on a live mapping interface.

Send Texts & Files – Instant messaging and file transfers to one or many contacts can keep you in touch when voice calls aren't convenient.

Worker Safety – Built-in SOS buttons, Man Down/Lone Worker security features, and the CYRN wearable panic button allow you to monitor your staff and cut down response times.

Real-Time Updates – Change routes, notify the team of changes, add members to groups, and activate dispatch features instantly.

DISPATCH

Push-to-Talk – Group Call, Private Call, and Broadcast All-Call with one touch from your dashboard. See asset's call status and listen to multiple group channels at once.

Asset Tracking & GPS Dispatch – Real-time GPS/AVL unit and personnel tracking on a live map interface.

Zones & Landmarks – Provide oversight and alarms assigned to geographical areas and places of interest for your team's routes and job sites.

Alerts, Alarms & Security – Units in distress are displayed instantly on the dashboard to provide crucial details and reduce response time.

Live Global Coverage – Link multiple locations, out-of-town offices, remote workers, international operations and global partners using one LINX network.

Analytics & Reports – Enhance your company's efficiency, response times, safety goals, and customer service by analyzing data from LINX system reports and improving on your daily operations.

EASILY MANAGE ALL ASPECTS OF YOUR DAILY OPERATIONS WITH **ONE SOLUTION.**

DEPLOYMENT

Don't have an IT team? Don't panic. **No expensive cabling, wiring or installation is needed** in order to launch LINX. WiFi or network coverage is all you need.

CONFIGURATION

Our customers can **customize** their network using either the **full feature set** or specific components based on their unique **business needs**.

PROVISIONING

Register users' **access permission**, assign members to groups, set alerts and alarms, and **define service controls** on your LINX network.

LINX seamlessly integrates **voice** and **data intelligence** into a **single, cost-effective** solution, allowing your personnel to **collaborate** more **efficiently** wherever they are **working**.

CYRN PANIC BUTTON

CYRN uses Bluetooth® technology in association with the LINX app to initiate calls and text messages with the user's GPS location from a smartphone.

CYRN can be carried discreetly in a pocket or a bag, worn on the wrist, on a keycard, or around the neck as a pendant.

ACCESSORIES

Harness the full potential of your **LINX** system with compatible accessories delivering increased durability, ease of use and reliability.

- Panic Button Wearables
- Remote Speaker Microphones
- Headsets
- PTT Buttons and more.
